The purpose of the meeting was to discuss the 2 potential hires with Engineering, Gergei Bana, and Shawn (Qiang) Cheng.

Discussion on the two candidates centered on whether there was interest in working with and hiring the two candidates. Little is known about the process yet, however, apparently the candidate would determine which dept. they prefer as their home department.

Bana would be hired in a tenure track position. Cheng would be tenured or tenure track as he is tenured now.

There was a motion and vote to determine if the department should have a confidential vote outside the meeting to determine interest in each candidate. The motion passed by the majority of hands to have a vote.
